Job Title: Maintenance Technician 1 (Low)	Reports To: Maintenance Supervisor
Approved: <i>C. Keel 4.2.18</i>	Reviewed: <i>[Signature] 4-2-18</i>

Job Function

Responsible for installing, repairing, and monitoring industrial production machinery and facilities. This is a position with exposure to electrical, mechanical, and hydraulic systems.

Essential Functions

- Follow prescribed Safety Regulations and immediately report any unsafe conditions to the Safety Coordinator.
- Ensure correct and safe operation of equipment and machinery
- Follow detailed instructions to perform predictive and preventative maintenance duties
- Identify faulty equipment through observation and testing metrics
- Ability to weld (stick & MIG) and perform pipe fitting (steel, copper, and PVC)
- Safely operate tow motor, power tools, multi-meter, hoists and hand tools
- Perform general maintenance functions (raise/lower shotends, charge bottles, and check cores)
- Safely work with electrical 120VAC and 480VAC and lower AC & DC control voltages.
- Hydraulically, be able to remove and rebuild hydraulic pumps and valves.
- Install new equipment (install conduit, run wire, install pipes, etc.) and follow mfg. instructions.
- Log work performed in a Computerized Maintenance Management System (CMMS)
- Maintain parts and tools inventory
- Continue to increase electrical, pneumatics, hydraulics and mechanical knowledge via on-going training, industry workshops and technical reading.
- Flexibility to work overtime as needed to meet production demands.

Qualifications

- Possess technical skills and have the ability to learn new skills
- Team player and willing to work with minimal supervision
- Good problem-solving and trouble-shooting abilities
- Possess good communication skills
- Able to lift and carry up to 50 lbs.
- Ability to follow detailed instructions
