Hello Parents and Students,

During the school shutdown period the Machine Technology I class will be utilizing ToolingU course work. We have purchased a subscription for every student so they can continue their training online. Attached are directions and [subscription code](#) for parents and students to follow in setting up the account. Use the link below to access ToolingU. Type in the subscription code and setup username and password. The classes follow along with the subject content we have been working on this year.

https://www.toolingu.com/lms/order_corp_password_check

Students should be able to access the website from most electronic devices. There is a lot of valuable information in the ToolingU courses. I will be monitoring student progress. Please email me if assistance is needed.

Thank you,

R Parrott
