

Hello Parents and Students,

During the school shutdown period the Machine Technology II class will be utilizing Immerse2learn MasterCam Mill course work. All students have a subscription and password so they can continue their training online. Attached are directions for parents and students to follow when accessing the account. Each student has a username and password. These classes follow along with the subject content we have been working on this year. Use the link below to access Immerse2learn:

<https://cvccworks.immerse2learn.com>

Use the link below to get MasterCam HLE (home learning edition) download:

<https://www.mastercam.com/downloads/>

Students should be able to access the website from most electronic devices. There is a lot of valuable information in the Immerse2learn courses. I will be monitoring student progress. Please email me if assistance is needed.
